System

IN-BATCH AND  
IN-CAN TINTING

DISPENSING

# JUNIOR

## IN-BATCH AND IN-CAN TINTING

- \_ One model up to 32 valves
- \_ Valve sizes are 1/2"
- \_ Valve pressure test up to 400 bar
- \_ Accuracy: +/- 0.1 g. (depending on product viscosity and scale type)
- \_ Dispensing viscosity up to 1 million cPs or mPa
- \_ Flow rate of 1000 litres/h. (depending on product viscosity and scale type)
- \_ Range of Dosage Containers up to 200 kg

## ADVANTAGES

- \_ Ideal for medium levels of productivity and high accuracy requirement
- \_ Exclusive patent with double circumferences of up to 32 valves
- \_ Dispensing becomes a safe and traceable process
- \_ The special O-ring free valves with patented design gives long lasting reliability
- \_ Complete handling solution: conveyor lines for empty pots/pails, barcode labeling, dispensing and finished container buffer parking
- \_ Specifically designed to optimize stock levels and avoid waste
